WHAT WE TALK ABOUT WHEN WE TALK ABOUT LANDSCAPE DESIGN

DDG is committed to providing environmentally-sustainable professional landscape design solutions. The landscape design typically addresses:

- THE LOCATION
- CHARACTER/MATERIALS OF LANDSCAPE PLANTINGS
- HARDSCAPE SURFACES
- ENTRY GATEWAYS
- LIGHTING DESIGN
- WATER FEATURES
- SITE FURNISHINGS

©2016 DEVELOPMENT DESIGN GROUP, INC. ALL RIGHTS RESERVED.

OUR APPROACH

DDG can provide a full range of landscape master plan services or for a specific area to fit the client's project requirements. A comprehensive professional landscape design program can be created after a site analysis of factors such as:

- CLIMATE
- SOIL
- FLORA
- FAUNA
- TOPOGRAPHY
- DRAINAGE

This approach benefits the quality, use and value of the built environment by enhancing the project's theme and identity and improving the project's sustainability through reduced water consumption and energy efficiency.

DDG can be retained to develop the project's:

- PROGRAM
- CONCEPT
- SCHEMATIC
- DESIGN DEVELOPMENT DOCUMENTS
- AMENITY SPECIFICATIONS
- COST ESTIMATES
- TIME SCHEDULES

XI CHENG

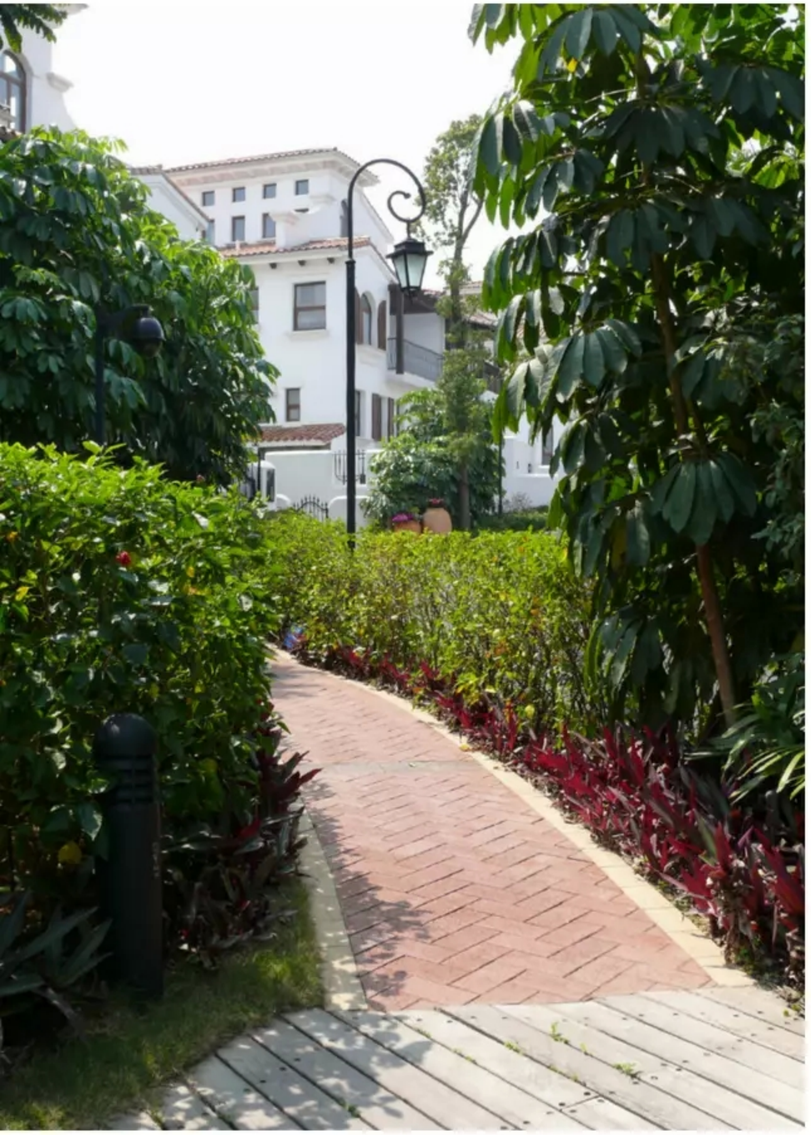
SHENZHEN
CHINA

52.7 ac
51.3 ha

Xi Cheng, which loosely translates to "Dawn of a New City", is a 568 acre residential and mixed use development that exudes elegant style and tranquility. Composed of three interconnecting areas, including the Buena Vista residential community and the Las Terrazas commercial district, and tucked against the base of majestic Jinggangshan Mountains its dramatic location resonates with urban convenience and comfortable community living. Pocket parks, green space and water emphasize the organic nature of the master plan. The layout flows with the existing topography; a natural progression of space that adds to a sense of discovery.

©2016 DEVELOPMENT DESIGN GROUP, INC. ALL RIGHTS RESERVED.

©2016 DEVELOPMENT DESIGN GROUP, INC. ALL RIGHTS RESERVED.



The service apartments and residential areas, while part of the overall core, have their own entrances and private garden spaces. A series of courtyard gardens and terraces at varying levels give maximum possible outdoor spaces to the residents to enjoy. Water cascades down along a linear garden into the clubhouse courtyard from pools and fountains on the southern hilltop, where a nature preserve surrounds a community swimming pool.

LAS TERRAZAS

SHENZHEN
CHINA

30.5 ac
12.4 ha

The center's retail, dining and entertainment are situated along a broad, tree-lined, crescent-shaped piazza. The village like layout of the project features many landscaped spaces to explore, dine and enjoy ranging from an open-air retail arcade lined with raised planters and shade trees to a large lawn area that provides seating space for performances at the open air pavilion. Water features and fountains are integrated on many levels in a seamless fashion to give comfortable and relaxed ambience for customers.

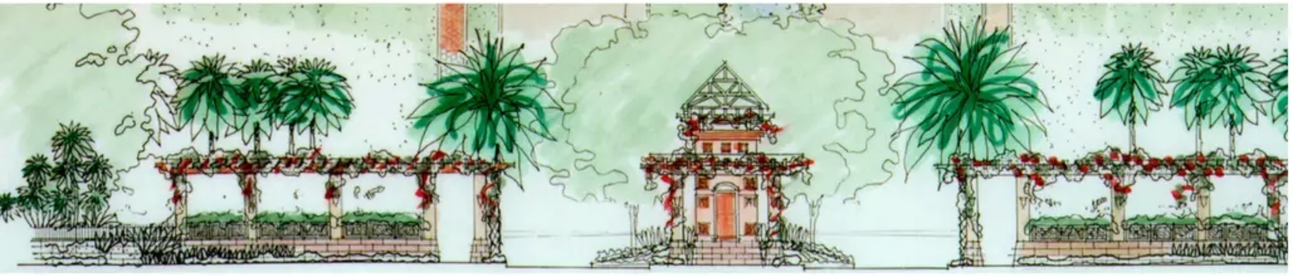
BATAM LAGUNA VILLAS

BATAM
REPUBLIC OF INDONESIA

104 ac
42 ha

Nature is central to the landscape at Batam Laguna Villas. The landscape design for this 42-hectare master plan integrates an indigenous mangrove forest with an exclusive hilltop eco-resort and a lakeside residential community. While providing views of the Singapore skyline and the Java Sea, recreational amenities and educational opportunities are provided through a series of upland lakes and a trail system, lush with a diverse palette of native tropical plant material.

©2016 DEVELOPMENT DESIGN GROUP, INC. ALL RIGHTS RESERVED.



Nature is celebrated with stone walls, stone columns, heavily carved wood trellis structures, flower-like paving patterns reminiscent of water lilies, and interpretive signage.

MALL OF ISTANBUL

ISTANBUL
TURKEY

34.5 ac
13.9 ha

Istanbul's new "life center," the Mall of Istanbul is one of Turkey's largest mixed-use developments. Appealing to the area's high income and upper middle class the project combines retail, residential, office and hotel elements with a large entertainment space. Four contemporary residential towers and a hotel tower stand atop landscaped platforms and connect to the mall's roof garden via a series of pedestrian skybridges.

©2016 DEVELOPMENT DESIGN GROUP, INC. ALL RIGHTS RESERVED.

Rooftop common areas between the towers share a unified palette of small shade trees, flowering shrubs and seasonal color accents while each tower's unique identity is individually expressed through four distinct compositions of plant material, gazebos and water features. One main recreation area roof garden contains several pools, a barbeque area, café and open lawn space.

A landscape of lush planting creates a memorable experience for visitors and residents of this new mixed use master plan. Various land uses, including, hotel, office, residential, commercial, cultural and riverfront park, are connected via a network of wide linear gardens. Anchored by a monumental garden, a densely landscaped greenway parallels the parkway and bridge allowing a safe pedestrian experience throughout the development. Flowering trees and shrubs, palm trees and fountains soften architecture and create a living buffer for public enjoyment, civic identity and economic viability.
